Session 3	Classrooms	
8.00	Meet in Haydock Hall	Showcase Performances
8.30	Depart	

SOME OF THE ACTIVITIES TO LOOK FORWARD TO:

Drama

The first term's focus was improvisation. Pupils performed a variety of scenarios where no planning was allowed. They had to think on their feet while responding appropriately to a variety of unforeseeable circumstances.

Parents, let's test your skills with:

- ⇒ On the spot news reports
- ⇒ Sentence generation. Pupils and parents receive sentences and are required to create a scenario based on the sentences that they are given with no time to plan

Art

Come and activate your creative side. Get your hands dirty and enjoy the opportunity to manipulate and create an idea with your hands. Papier Mache is the medium. Let's see what you can do together.

What did you do at school today?

Come and see for yourself.....

Social Science

Driving statement:

Advancements during the Industrial Revolution (1760 – 1840) had a positive impact on world population growth.

Engage in this discussion with your child as you are presented with the opportunity to participate in a project, focusing on a chronological study of advancements made during the Industrial revolution and their impact on population growth.

Natural Science

We have explored the natural Wetland at the Helderberg Nature Reserve this term and have been learning about water as a solution. We have also learnt about purifying water of solubles and insoluble. We love doing practical investigations and this is a hands on opportunity for you to create a "Wetland in a bottle" to see how nature purifies our water.

Music

Two Music modules are on the go at the moment:

Bucket drumming and Music Tech:

In the drumming classes, the pupils have been learning about rhythm, crotchet and quaver notes. Join in with some creative beats and see if you can keep up.

Music Tech is a new module being offered to our senior pupils this year. Digital music is a reality and is established as a significant game changer in the world of entertainment. Come along and see the apps the children have been working with.

Afrikaans

Creativity in writing. Be inspired by pictures to write and share ideas in Afrikaans. Don't be afraid! Dictionaries and Mrs Rossouw are on hand to assist you.

English

A precept is a motto or principle by which we can live our lives and direct our thoughts and actions.

In class, we have developed our own precepts, inspired by the book Wonder.

What is your precept? Create your own precept, which will be displayed on the Powerful Parents Precepts board. The sharing of precepts is an enriching experience as it allows insight into each other and what we find important. It can also serve as inspiration to others.
